1. For the past three months from August 2, 2017 to November 15, 2017, the types of firearm accidents in US states are expressed in circos according to the number of victims. The stack graph above the state field represents the gun control law for each state.

2. Compare Nevada to Texas, and show the details below.

## ABSTRACT

In Las Vegas, Nevada, mass casualties occurred, resulting in numerous casualties. We can look at the types of firearm accidents that happen frequently in US states. In order to find the cause of frequent firearm accidents, we examine characteristics of each state. To explain the visualization in detail, On the right side of the circle, the number of victims classified in the US states, the number of victims classified according to the type of gun incidents' on the left side of the circle and The right outer stack graph shows gun control legislation. This design allows us to compare data in size, color and sort order of USA's states index. (Our slideshow is web-based. Please see our slideshow at <https://visprojects.hanu.io/pacificvis/gun.html>).
